January is National Blood Donor Month

Check in with the American Red Cross Blood Services site to learn more about need, eligibility, and to find local blood drives.

"January marks the 52nd anniversary of National Blood Donor Month – a time to recognize the importance of giving blood and platelets while celebrating the lifesaving impact of those who roll up a sleeve to help patients in need.

This year’s National Blood Donor Month comes as the nation’s blood supply has dipped to concerning levels and could force hospitals to delay essential blood and platelet transfusions. Blood donors of all blood types – particularly type O blood, the blood group hospitals need most – are needed now to give blood or platelets to help meet daily hospital demands." – American Red Cross

Why Blood Donation is Important and Who Benefits
Accident and burn victims, heart surgery and organ transplants, those battling cancer and sickle cell disease. Read personal stories of people whose lives were saved by a blood donation.

5 Legit Reasons Why to Donate Blood
It's a small act of kindness that can make a big difference in someone's life!
