

Virtual Presentations Overview

- I. Ways to Present Virtually
 - a. Typically, there are two forms of Virtual Presentation: **Virtual Lightning Talks** and **Virtual Posters**
 - i. **Virtual Lightning Talks** are short (6-minute) presentation videos uploaded, sometimes to YouTube and shared as links, and then displayed at the conference.
 1. These can be slide presentations (as a prop) or other formats, as appreciate to the field of study
 2. This format is perfect for summaries of research and discussions on purpose, methodology, outcomes, or future work.
 3. Please see handouts on how to construct a Lightning Talk and associated video
 - ii. **Virtual Poster presentations** consist of one slide/PDF page with an associated 3 minute “elevator message” video of the poster contents.
 1. Like in-person Poster Sessions, Virtual Posters are ideal for displaying on-going, preliminary, and final work in a visual and engaging manner.
 2. Please see handouts on how to construct a Poster Presentation and associated 3-minute video
- II. Overview
 - a. Virtual lightning Talks and Poster sessions are designed for presenters who are not able to be present in person at the conference.
 - b. Travel, funding, and schedule can sometimes make it difficult for participants to attend the conference in-person.
 - c. In order to support more inclusive participation, virtual sessions enable participants to present work to a body of peers and to engage with colleagues from afar, bringing global ideas to the local spaces.
 - d. All virtual posters and associated audio-visual narration message (integrated or separate file) should be submitted one week prior to the start of the conference / event they are to be presented at.
